

Syed Ashif

Junior Software developer

 syedashif71@gmail.com  +91 9360508926  Salem

PROFILE

Results-driven Frontend Developer with 2+ years of professional experience in designing and developing responsive, user-friendly web applications. Skilled in **React.js and Angular**, along with **TypeScript, JavaScript, HTML, and CSS**, with strong hands-on experience using **Angular CLI, NGXS** for state management, and modern React architecture using Hooks for state and lifecycle management. Focused on building scalable and high-performance UI solutions. Experienced in collaborating with cross-functional teams to deliver quality products on time. Passionate about learning new technologies, improving performance, and creating clean, maintainable code that enhances user experience.

EDUCATION

07/2019 – 05/2023 Salem, India	B.Tech(IT) , <i>Mahendra College of Engineering</i> Gained strong foundations in computer science, programming, and web technologies, with practical exposure to software development and problem-solving.
-----------------------------------	--

PROFESSIONAL EXPERIENCE

05/2025 – Present Coimbatore, India	Software Developer , <i>Sierra Digital Inc</i> Project: HRMS – Human Resources Management System (Onboarding Process) - Developed interactive employee onboarding workflows using React.js and JavaScript, streamlining employee data collection and document submission. - Built dynamic multi-step forms with robust field-level validation to accurately capture personal, professional, and compliance-related information. - Implemented a stepper-based progress tracking UI to improve user navigation and onboarding clarity. - Integrated RESTful APIs to securely fetch, validate, and persist onboarding data in real time. - Designed a responsive and accessible UI using HTML5 and Tailwind CSS, ensuring seamless usability across devices. - Used Git for version control and collaborative development, maintaining clean, structured, and well-documented code.
04/2024 – Present Coimbatore, India	Software Developer , <i>Sierra Digital Inc</i> Project: ORBit – ETL (Extract, Transform, Load) - Designed and developed ORBit, a scalable ETL platform to streamline data integration across multiple heterogeneous data sources. - Built a responsive and user-friendly frontend using React.js, JavaScript, HTML5, and CSS for managing ETL workflows.

- Implemented features for **data extraction, transformation, and loading**, including data cleansing, mapping, and enrichment capabilities.
- Supported **real-time and batch processing** to ensure efficient and optimized data flow into target systems.
- Developed **monitoring and logging modules** for job tracking, error handling, and performance analysis.
- Integrated **CI/CD pipelines using Azure DevOps Server** for automated builds and deployments, ensuring reliable releases.

SKILLS		
• Angular	• Typescript	• ReactJs
• Javascript	• ExpressJs	• NodeJs
• Angular CLI	• NGXS	• SQL
• Git		

CERTIFICATES
Programming with JavaScript ↗ Gained hands-on experience with JavaScript fundamentals, including variables, functions, loops, arrays, objects, and event-driven programming. Built interactive applications to strengthen problem-solving and coding skills.
