Syed Ashif

Junior Software developer

syedashif71@gmail.com +91 9360508926 Salem, Tamil Nadu, India Syed Ashif

PROFILE

Software Developer with **3+ years of professional experience** building enterprise web applications, ETL and data-integration solutions, business workflows, and cloud-deployed applications. Experienced across **frontend, backend, API integration, databases, SAP integrations, cloud platforms, and deployment environments**.

Strong hands-on experience with **React.js, Angular, TypeScript, JavaScript, Node.js, Express.js, Python, FastAPI, SQL, REST APIs, and Tailwind CSS**. Experienced in developing responsive and reusable UI components, multi-step business workflows, REST API integrations, ETL pipelines, data transformation, monitoring and logging solutions.

Hands-on experience working with **SAP BTP, Cloud Foundry, SAP HANA Cloud, OData, RFC, and AWS**, including application deployment, data synchronization, integration troubleshooting, and production support.

Experienced in **Git, Azure DevOps, CI/CD, Linux, Nginx, PM2, Redis, RabbitMQ, Apache NiFi, Sequelize, and SQLAlchemy**, with a strong focus on building maintainable applications and troubleshooting end-to-end technical issues.

TECHNICAL SKILLS

Frontend
React.js, Angular, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vite, Redux Toolkit, TanStack Query, React Hook Form, Zod, React Flow, Recharts

Database
SAP HANA Cloud, PostgreSQL, SQL Server, MySQL

APIs & Integration
REST APIs, OData, SAP BTP Destinations, SAP Cloud Connector, SAP RFC/BAPI

Processing & Infrastructure
Celery, Redis, Linux, Uvicorn

Backend
Python, FastAPI, Node.js, Express.js

Data & Migration
ETL, Data Migration, Data Mapping, Data Transformation, Data Cleansing, Data Staging, Pipeline Processing

Cloud & Deployment
SAP BTP, Cloud Foundry, AWS, Docker, Nginx

Tools & Platform
Git, Azure DevOps, Postman

PROFESSIONAL EXPERIENCE

10/2023 – Present
Coimbatore, India

Software Developer
Sierra Digital Inc

- Develop and maintain enterprise web applications using **React.js, TypeScript, JavaScript, Python, FastAPI, and REST APIs**.
- Design and implement responsive, reusable frontend components and business workflows.
- Develop frontend and backend functionality for enterprise applications and data-processing solutions.
- Integrate applications with databases, APIs, cloud services, and external enterprise systems.
- Work with **SAP HANA Cloud, PostgreSQL, Redis, and SQL-based data sources**.
- Develop data migration and processing workflows involving data extraction, staging, transformation, validation, mapping, and loading.
- Configure and troubleshoot application environments across local, cloud, and production environments.
- Deploy applications and supporting services using **SAP BTP Cloud Foundry and AWS**.
- Configure cloud services, destinations, connectivity, environment variables, service bindings, and application routes.
- Troubleshoot application, API, database, authentication, connectivity, and deployment issues.
- Work with Git and development/release workflows for collaborative software development.
- Collaborate with developers, QA teams, and business stakeholders to implement and support application requirements.

PROJECTS

04/2024 – Present

ORBit AI Migration Platform

Enterprise Data Migration & Integration Platform for SAP and Non-SAP Systems

Enterprise data-migration platform built with **React, TypeScript, Python, FastAPI, SAP HANA Cloud, and cloud integration services**, supporting migration pipelines, connector configuration, data mapping, cleansing, and monitoring.

Frontend

- Developed the **React/TypeScript** frontend for migration projects, connector configuration, field mapping, pipeline management, execution monitoring, and data processing workflows.
- Built dynamic forms, data tables, dashboards, visual pipeline interfaces, and reusable components using **React Hook Form, Zod, TanStack Query, React Flow, and Recharts**.

Backend

- Developed REST APIs using **Python, FastAPI, SQLAlchemy, and Pydantic**, supporting migration projects, connectors, landscapes, pipelines, executions, and application workflows.
- Worked with **SAP HANA Cloud** as the primary application database and **Celery with Redis** for asynchronous and long-running migration processing.

Migration & Integration

- Worked on end-to-end migration pipelines covering **data extraction, staging, field mapping, transformation, validation, cleansing, and loading**.
- Worked with configurable connectors for databases, APIs, files, cloud services, and SAP systems, along with **SAP BTP Destinations, Connectivity services, and SAP Cloud Connector** for enterprise connectivity.

SAP Connectivity

- Worked with on-premise SAP connectivity through **SAP Cloud Connector and BTP Connectivity/Destination services**.
- Worked with the **Java/JCo bridge** for SAP RFC/BAPI communication and supported connectivity between the ORBit backend and on-premise SAP systems.

AI & Data Processing

- Worked on **AI-assisted field mapping** to suggest source-to-target mappings with confidence scores as part of the migration workflow.
- Worked with the **AI data-cleansing workflow**, where staged migration data is processed and cleansing results are returned for further migration processing.

Deployment

- Deployed ORBit on **SAP BTP Cloud Foundry**, including the React frontend, FastAPI backend, and Java/JCo bridge, with required destinations, connectivity services, bindings, and environment configuration.
- Deployed ORBit in an **AWS environment** using Docker containers and handled application configuration, deployment, runtime, and connectivity-related troubleshooting.

Support & Troubleshooting

- Troubleshot application, API, database, authentication, SAP connectivity, Cloud Foundry, and deployment issues across development and production environments.
- Worked with Git, Linux, application logs, Cloud Foundry runtime configuration, service bindings, and resource configuration to diagnose and resolve issues.

05/2025 – 01/2026

HRMS – Human Resources Management System

Employee Onboarding & Digital HR Workflow Application

Description

Employee onboarding and HR management application designed to digitize employee information collection, validation, document submission, and onboarding workflows.

Responsibilities

- Developed the employee onboarding application using **React.js and Tailwind CSS**.
- Developed a multi-step onboarding workflow covering personal, address, emergency contact, bank, document, and employment information.
- Built reusable form components and implemented field-level validation.
- Implemented stepper-based navigation and onboarding progress tracking.

- Integrated frontend modules with REST APIs.
- Implemented document upload and validation workflows.
- Implemented file-type and file-size validation for employee documents.
- Implemented input sanitization and validation for employee information.
- Developed responsive UI components for different screen sizes.
- Worked with backend developers and business teams to implement HR onboarding requirements.
- Used Git for source control and collaborative development.
- Debugged and resolved frontend and API integration issues.

EDUCATION

07/2019 – 05/2023
Salem, India

B.Tech(IT)
Mahendra College of Engineering
Gained strong foundations in computer science, programming, and web technologies, with practical exposure to software development and problem-solving.

CERTIFICATES

Programming with JavaScript
Gained hands-on experience with JavaScript fundamentals, including variables, functions, loops, arrays, objects, and event-driven programming. Built interactive applications to strengthen problem-solving and coding skills.
